MODEL 40 NEEDLE GUN

"REDUCED VIBRATION"

Model 40 Features and Specifications

Stop repetitive motion syndrome. Using our latest technology for vibration suppression*, this dust free needlegun operates with far less motion than an ordinary gun. Low vibration and high blow frequency results in less operator fatigue and increased production. The 3-cfm air requirement allows this needlegun to operate on a limited air supply.

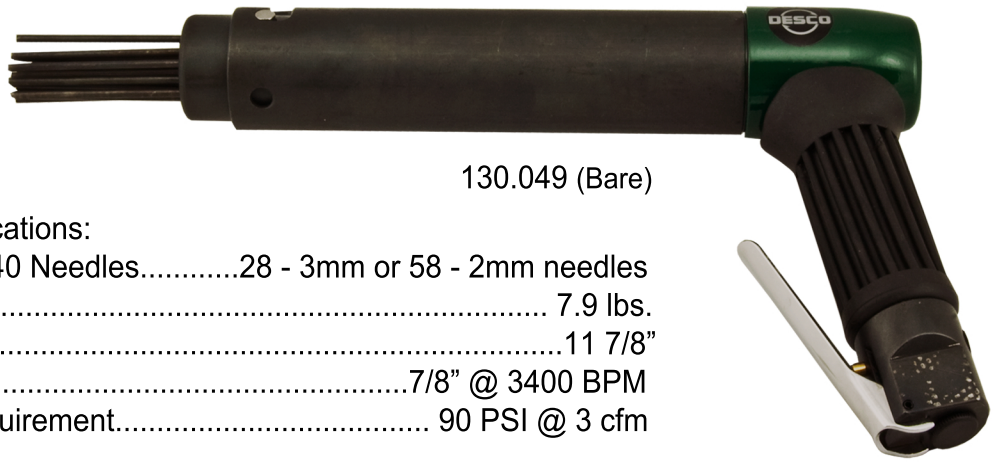

***See the Model 40 Vibration Test Report.**

130.050 (Flat Shroud)

130.052 (Inside Corner Shroud)

130.049 (Bare)
