

DUST FREE FX TOOL

Hand-Held FX Tool

The FX Tool was designed for only one reason – PRODUCTION. The FX Tool, with its multiple interchangeable abrasive heads, is the most aggressive mid-sized tool available today. The interchangeable abrasive heads or hubs perform as follows:

- **Roto Peen Hub** – Employing 3M Roto Peen, the FX Tool performs like a hand held shot blast machine capable of achieving SSPC SP11 cleanliness.
- **Hammer Hub** – The FX Tool performs like a high-speed needlegun.
- **Cutter Hub** – With this most aggressive hub, the FX Tool performs as a scarifier and is used for removing heavy coatings, including high solid non-skid, as well as scarifying concrete.

Power - Air	90 psi @ 39 cfm
Cleaning Swath	4.25 inches
Cleans to within 1" of vertical surface	
Productivity	300 sq.ft. per hour

Rotary Scarifiers

Desco's FX Tool and Mini-Flushplate systems were designed as an innovative solution for applications previously requiring multiple tools. The Desco FX Tool enables the operator to make up a number of tools by simply changing out the abrasive hub. Whether removing rust and corrosion, heavy coatings or providing a mechanical shot blast profile, the Desco FX Tool Systems are capable of tackling all these applications with a simple head change. Desco FX Tool Systems also include engineering controls that enable safe use in the most hazardous environments, including lead abatement and even radioactive decontamination.
